Harper International speaks the language of thermal processing solutions.

Harper specializes in a wide range of equipment for the process industries, including:

Fluidized Bed System

Highly engineered Fluidized Bed Systems for coatings and high value products

Rotary Furnace Systems

For Oxidation or Reduction Reactions

Vertical Gas-Solids Reactors

Dense and Dilute Phase

Talk with a world leader for expert engineering and proven process development capabilities.

Harper International provides customized processing systems requiring precise control of atmosphere, temperatures, and kinetics. While others may understand the hardware, we understand your process and can help you optimize the solution while minimizing capital and operating costs.

We provide groundbreaking R&D, pilot plant, full production and complete post sales support. The Harper Technology Center provides process development to optimize scale-up. Contact Harper International at (716) 684-7400, ext. 189 or visit our web site at www.harperintl.com.
