News Release

### **Harper International- Carbon Fiber Systems**

---

Harper International, Lancaster, New York reports that it has received orders from around the world for new carbon fiber furnace systems. Harper is currently supplying carbon fiber furnace systems on three continents.

Carbon fiber usage has surged with increased demand for high strength lightweight composites. Airbus and Boeing are major consumers of composite materials for their new aircraft designs along with soaring usage in rotor blades for large wind turbine generators.

Harper is a recognized leader in Carbon Fiber manufacturing systems for both PAN and PITCH based technologies. Incorporating new advances in the latest designs, has demonstrated superior temperature uniformity with unique atmosphere control for Harper's Carbon Fiber furnaces.

Harper International is a leading supplier of advanced thermal processing systems for highly technical applications with an in-house Technology Center to provide real solutions.

Harper International has over 80 years of experience serving the Nuclear, Electronics, Inorganic Materials, Carbon, Carbon Fiber, Graphite, Metal Oxides, Battery Materials, Fuel Cell, Solar Cell, Nano Materials, and Bio Fuel Industries.
